New maps added include Suldal Harbor (6v6), Petrov Oil Rig (6v6), Livestock (Gunfight) and Verdansk International Airport (Ground War). The focus of Season 5 was around the verdansk stadium now on opening and in the mid-season update, we're getting it as a shooting map. The launch level of the largest stadium is the featured and much smaller play space in Gunfight - remember to use those tents, boxes and other obstacles to cover yourself. THE CROWD GOES WILD: Stadium arrives at Gunfight alongside them, in the mid-season update, is the FINN LMG. The FINN LMG will drill well above its weight against many of the existing GMOs. This new LMG can be earned by completing an in-game challenge or a plan variant can be purchased by purchasing the Mainframe Package. An agile, mobile and hostile tank of an LMG, the FINN's ultralight, open-bolt design combines uniquely with advanced recoil controls. All of this adds up to a weapon with exceptional full auto accuracy while still being lightweight, allowing for a unique play style that further blurs the line between an assault rifle and LMG. FINNESSE: The new agile LMG arrives in the mid-season King Slayer update is the large-scale Team Deathmatch in Battle Royale where teams fight for points by defeating hostile players. However, the circle does not collapse, but moves around the for an agile battle on the go. The player of the top five qualifying players will be marked as a 'king' on the Tac Map. Eliminate kings to earn additional points and receive a free kill streak. For the first time in the history of the Call of Duty franchise, community members around the world can represent their country in easy-to-play, hard-to-master, single-player skill tests. By winning medals in each test, competitors will demonstrate which country-level one operators are really the best the world. Within the 'Summer Games', there are five Trials. These miniature experiences are similar to those introduced in the release of Modern Warfare and in the post-release season updates. Trials will be available to free Modern Warfare and Warzone players, starting August 28 at 10am PT/6pm BSTPlayers will have unlimited tickets, which means you can keep playing to set your best time or score and go for Gold. GAME TIME: The summer of games is the Call of Duty Olympics Next to Season 5 comes a new faction for Modern Warfare and Warzone. The Shadow Company has arrived at Call of Duty with a selection of operators to represent them. Let's take a look at what we know about Shadow Company and what they'll bring to Call Of Duty. Activision's Blog reveals: An elite PMC, Shadow Company operates outside the bounds of the original Armistice. Forged from the fires of the fight between the Coalition and Loyalty, Shadow Company has its own framework and agenda. Shadow Company is a group of splinters formed without compromise, ready to take the war directly to Mr. Z and Verdansk and deal with terrorist threats directly. Shadow Company is an unpretentious organization operating on its own terms. All Shadow Company members have formal military experience and are experts in their field. Shadow Company will bring with it a trio of operators with a wide range of skills. Shadow Company consists of Rozlin Roze Helms (formerly Jackals), Velikan, and Marcus Lerch Ortega, the company's leader. Activision's Blog has some interesting details about each of the operators, see below: Lerch comes from Plano, Texas and is a former member of the United States Marine Corps. Known on the battlefield for his enthusiasm and success in eliminating the enemy, it was better to have Lerch with you rather than against you. After USMC, civilian life is not in Lerch's interest, so he re-entered the fight in the private sector and is considered a one-man force multiplier. When shadow Company CEO came across Lerch's dossier, it was the perfect combination of skill and moral flexibility. There is no contract that Lerch will not assume or defy that he will not face, which is how he is in Verdansk leading the other Shadow Company.No much is known about Velikan. Dressed in full body armor for protection in battle and to hide your identity, little is confirmed about this Operator. A shadow shadow. Tales of his exploits are written as fairy tales at best and rude exaggerations at worst. Those who know him never speak ill of him. Whether out of fear or respect, no one knows. Rozlin Roze Helms joined the Shadow Company after of the Jackal Loyalty faction. Previously, Roze severed ties with the Armed Services and returned to support his family and father. Periodically in contact with Mace, now a PMC who left the army after leaving his post in protest at the combat orders that Roze won entry into the Mercenary Group Jackals. Now Roze is letting his skill prove his worth, as he provides support to Shadow Company while remaining in cordial terms with Mace. There will be 100 levels of content, some of which will be free, but the rest requires players to purchase the Pass for 1,000 CoD points. The Battle Pass traditionally features a variety of weapons, blueprints, emblems, stickers, charms, business cards, watches, operator skins, vehicle designs, finishing moves, XP tokens and COD points. Each pass has had a Featured Operator so you can get instant reward with special skin once you reach the maximum rank; This season features Lerch. Rodion also shows off his alliance with Shadow Company with skin and Archangel mission. In addition to Lerch's evolving skin and Rodion's Archangel outfit, expect a number of additional skins (with associated operator missions) as you progress through the Battle Pass. There's Safeguard otter skin, Domino Lynx skin, Joint Task Force Mil-Sim skin, Yegor Honcho skin, Wyatt Pursuit Special skin, Syd Chill Pill skin, Talon Jackdaw skin and Cut and Run skin for Iskra. Finally, if you want to defeat an enemy with a jet black-bill savaging of an attack raven, be sure to equip the Nevermore finisher! The ultimate reward for the Fifth Season Battle Pass is the Rook skin for Roze, as well as the skin of The Veil vehicle, and more. Shoot for The Power of the Company; Negative tracer rounds for The Lima Assault Rifle to fill your enemies with fear as well as projectiles! The Fifth Season Battle Pass system allows you to get two new weapons: iso SMG (level 15) and AN-94 assault rifle (level 31) that all Modern War players, including Warzone, can win for free, just by playing the game. This season, players can also get a trio of Wartracks to play while driving vehicles. Expect a dark and unsettling look for many of the Battle Pass items that are maintained with the arrival of Shadow Company. These include a variety of vehicle skins such as the Tarrasch (ATV) and the Siege Tower (Cargo Truck). Continue your collection of matte black vehicles with Night Ranger (SUV) leather. Take a look at all aspects of the vehicle in the Battle Pass system and equip them in the Vehicle Customization menu. You can also purchase 20 level jumps for 2,400 CoD points. If you managed to cross the Season 4 Battle Pass, you should have earned enough points to purchase the Season 5 Pass for free. Spec Ops mode receives less love as time goes on, although some new maps have been added to survival mode. No updates for Spec Ops this time. A new season means new operators and as more campaign characters are added to the mix, there are still many who could get there. Last season we had Captain Price starring alongside Gaz and Roze, but who could join him? Shadow Company to join new season with Marcus Lerch Ortega as Battle Pass with Velkin and Morte arriving later. In the mid-season update, we're also going to get Morte, who is a west-loving gunman ready to set the law for the Coalition. Sergio Morte Sulla is originally from Italy and is an expert tracker who loves the Old West. He served with legendary paratrooper regiment Col Moschin in Italy before being selected to join Warcom. The new season came with Bare Bones and S&D Double Down. Now we're getting more new modes. In this variant of Ground War mode, three flags are placed toward the center of the map, similar to Domination mode. If you or a teammate are knocked down, you enter Spectator mode instead of reappearing, rejoining the battle only after your teammates secure a new flag. Claim all three flags and automatically win the round. Win enough rounds, and your massive platoon will win the win. Gunfight tournament winners will be rewarded with XP, high-level cosmetic rewards and bragging rights as summer tournament winners. All players can participate in the tournament during the free access weekend from August 28 to September 2 with the Gunfight tournament playlist.
